Subject:
GE Aviation – Altitude Test Facility
Annual Remedial Activities Summary Report for 2018

ENVIRONMENT

Dear Mr. Ramanauskas:

The purpose of this letter is to serve as the Annual Remedial Activities Summary Report for the 2018 reporting period in accordance with the Long-Term Remediation Plan (ARCADIS, 2013) and the Consent Agreement and Final Order (“CAFO”) (TSCA-05-2014-0008) filed on April 28, 2014. The GE Aviation facility in Cincinnati, Ohio (an operating division of the General Electric Company [GE]) did not conduct any pipe removal/paint remedial activities at the Altitude Test Facility between January 1, 2018 – December 31, 2018.

Date:
February 20, 2019

As of the completion of Phase 3 removal activities as documented in the Annual Remedial Activities Summary Report for 2016, no further PCB containing paint remained on any portion of the ATF piping network. As of the end of 2016, all affected piping had either been replaced or remediated as detailed in the Annual Reports for 2014-2016. This explains why both the Annual Report for 2017 and this Annual Report for 2018 document that no remedial measures were undertaken in these years.

Even though all of the ATF piping network is now free of PCBs, GE Aviation has continued to maintain the fencing around the ATF and continues to conduct PCB M_L Marker Inspections. Documentation of the PCB M_L Marker inspections for January through December 2018 are included in **Attachment A**. GE will continue to abide by the applicable terms of the CAFO and the Long-Term Plan and will submit Annual Summary reports as required.

Please do not hesitate to contact John Rumpf, Counsel for Environmental Affairs at GE Aviation, at (513) 240-5724 or me at (315) 447-4555 if you have any questions.

Sincerely,

Arcadis U.S., Inc.

Lyle Grant

Senior Construction Manager
